

Special

Musiq Soulchild

Thinkin' 'bout what we are, thinkin' 'bout what we do
What do you mean to me? What do I mean to you?
How many times have we felt the necessity
To be together 'cause separate never works? You're like the rib I need, somethin' like Adam and Eve
I was meant for you, you were meant for me
How you fell bout me, girl? Do I light up your world?
'Cause you're the reason why lovin' is on my mind But is that askin' too many questions
Or am I too fast or offensive?
But if you could please just pardon
My inquiren' mind 'cause I just know You and me go good together
Alright, okay, me and you got somethin' special
No doubt, chemistry don't get no better
Alright, okay, you and me got somethin' special What do you do when you know that you're being pursued
Would you play innocent? Would you just let me in?
Just let me show you more 'cause there's so much more in store
I was just wonderin' right why not go out tonight Eat where the prices are high, order whatever you like
Or we could take a ride or count the stars in the sky
Maybe just stay in the crib, spend a whole day in the bed
Maybe I should start by sayin' hello instead But is that askin' too many questions
Or am I too fast or offensive?
But if you could please just pardon
My inquiren' mind 'cause I just know You and me go good together
Alright, okay, me and you got somethin' special
No doubt, chemistry don't get no better
Alright, okay, you and me got somethin' special Girl you're so far
(From ordinary you're)
By far yeah, you're so
(Extraordinary you're)
One of a one second to none
(girl, it's just that serious) I'll never find
(Another one like you, no)
I mean I could if I tried
(But she wouldn't be like you though)
You're the only one I want in my life
(Tell me do you feel what I do or) Is that askin' too many questions
Or am I too fast or offensive?
But if you could please just pardon
My inquiren' mind 'cause I just know You and me go good together
Alright, okay, me and you got somethin' special

No doubt, chemistry don't get no better
Alright, okay, you and me got somethin' special
Is that askin' too many questions
Or am I too fast or offensive?
But baby, if you could please just pardon
My inquiren' mind 'cause I just know
You and me go good together
Alright, okay, me and you got somethin' special
No doubt, chemistry don't get no better
Alright, okay, you and me got somethin' special
