

Flatline

Porsha Williams

Stupid me, keep trying to fight for what they are
But I don't even know what that is
It's killing me 'cause I keep holding my breath
Praying we can revive what once was

I feel the pain take me under, no air baby
I raise myself for the numb that show me to come
When love has no pulse

I need a shock on my chest
I'm just flatline (flatline)
There's not a feeling to take cause your heart isn't here
It's elsewhere
And I wonder
If we would deal, they would stop that on level 5
We were better off apart
You took the life out of me
My heart is broken and is flatlined, it's flatlined

No tick tocks, a shock, yeah they took a pass
They're losing moment I felt for
The time has pass
And now I feel the cold ripped a part of flesh on my skin

I'm dying inside gasping for air
Screaming save me
I gave in to the pain, no ... or strain
Let it take me

I need a shock on my chest
I'm just flatline (flatline)
There's not a feeling to take cause your heart isn't here
It's elsewhere
And I wonder
If we would deal, they would stop that on level 5
We were better off apart
You took the life out of me
My heart is broken and is flatlined, it's flatlined

Fading, fading, fading

I'm fading, fading, fading, fading
I'm fading, fading, fading
I'm fading, fading, fading, fading

You could had let me live
You took the very life from me, oh
With everything I had
I love you till it hurt and now it's killing me, oh...

I need a shock on my chest (Somebody revive you)
I'm just flatline (flatline) (Somebody revive me)
There's not a feeling to take cause your heart isn't here
It's elsewhere
And I wonder, if we would deal, they would stop that on level 5
We were better off apart
You took the life out of me
My heart is broken and is flatlined, it's flatlined

I need a shock on my chest
I'm just flatline (flatline)
There's not a feeling to take cause your heart isn't here
It's elsewhere
And I wonder
If we would deal, they would stop that on level 5
We were better off apart
You took the life out of me
My heart is broken and is flatlined, it's flatlined
