Let It Rain

Tinchy Stryder

Yo, black clouds are looking darker, we bring the night to life
I hope you got your lighter, spark the match and light
Somehow we all survived although they dimmed the lights
They try to knock my future down, the trees they tried to hide
They say I'm an optimist, now look I topped the list
Approved but not to this from negative to positive
Yeah, don't fight the plane, no parachutes, we let it rain
From the inn I brought my troops
Forecast to be gray again
Feels as if it never ends
Won't hide behind the door anymore
Let it rain, let it rain
You see the
Drip, drop coming, everybody give way
Can't stop falling, may as well embrace
Let it rain, let it rain, let it rain
You see the
Drip, drop coming, everybody give way
Said I wouldn't last for long
Said I had one hit and wondered 'bout my part in songs
Asking what's the label on
Had this came along, why the hell the signed restraints?
Told my A and R he's okay, but now the game is wrong
Now picture this, now I've got his day miss
I've planned it all to rule the black the mist
And now it's ours, let it rain for hours
From the basement to the rooftops, we just played the powers
Forecast to be gray again
Feels as if it never ends
Won't hide behind the door anymore
Let it rain, let it rain
You see the
Drip, drop coming, everybody give way
Can't stop falling, may as well embrace
Let it rain, let it rain, let it rain
You see the
Drip, drop coming, everybody give way
I'm stepping out tonight
There's a life worth more

(I hear it calling)
I'm afraid no more
(Can't stop me falling)
Behind the gray there's light
(Black clouds)
I'ma reach it by
(Standing across)
At the end, I know
I'm gonna to be alright
You can keep it moving on
No time for dwelling on
They hum, we sing along
We're gonna be alright
I know you see
In fact they all believe
Them clouds above of me
I let it rain, let it rain
You see the
Drip, drop coming, everybody give way
Can't stop falling, may as well embrace
Let it rain
You see the
Drip, drop coming, everybody give way
