

Seven

Ed Kowalczyk

Seven Gallows
On seven hills with seven suns
Seven Hangmen
Sing the dirge and beat the drum Take my heart away
From this place of no return
and set it far from here
In the name of all that's good How could you leave me this way?
It's cold outside
On my knees I pray
How could you leave me this way
The lights are low
Fade into black again
How could you get me so high
Just to bring me down
Into this valley again
How could you leave me this way Seven maidens
Seven boats and seven seas
Black wide ocean
Open up and swallow me I can't find my way
With only stars to be my guide
I surrender now
Eviscerate my pride How could you leave me this way?
It's cold outside
On my knees I pray
How could you leave me this way
The lights are low
Fading to black again
How could you get me so high
Just to bring me down
Into this valley again
How could you leave me this way Could you give a sign today?
How could you hide your sweet face
Am I crying here in vain? How could you leave me?
In dark nights unknowing clouds
They wrap around the
Sweet soul you gave me
You can save me I'm gonna stand right here
I'm gonna scream like a little baby
Call me crazy How could you leave me this way?

It's cold outside
On my knees I pray
How could you leave me this way
The lights are low
Fading to black again
How could you get me so high
Just to bring me down
Into this valley again
How could you leave me this way?How could you leave me this way
