

# Being With You

## that dog.

I sit with emptiness waiting for your call  
Will you still love me after the fall?  
An open phone line but I still hit your walls  
And it's just like being with youThe cold rejection that we conceive  
Our whole reflection that I can't believe  
We'll say it's over but won't feel relief  
It's just like being with you  
It's just like being with youYou know what you need to do  
And I know what's right for me  
And you know what you need to do  
And I know what's right for meA happy birthday I will wish you  
A swollen memory, so we must choose  
A tearful goodbye but we can't lose  
It's just like being with you  
It's just like being with youAnd you know what you need to do  
And I know what's right for me
