

# Astronomy

## Dragonland

I'm getting closer  
In a higher ground  
My destination  
Lies beyond the sun  
Not afraid of failure  
to crash and burn  
If you're not living  
you will never learn  
constellations far  
revealing my destiny  
Astronomy  
there among the star  
Like a higher conscience  
living in my mind  
You're always with me  
Till the end of time  
It is there before me  
Undisguised  
No hesitation:  
I'm on the rise  
Constellations far  
Revealing my agony  
Astronomy  
There among the star  
"A life without strife is a moonless night"  
Astronomy  
"Ascend to sky of endless light"  
Astronomy [Solo: MÄ¶rck, Holmlid] Constellations far  
Revealing my destiny  
Astronomy  
There among the star  
"A life without strife is a moonless night"  
Astronomy  
"Ascend to sky of endless light"  
Astronomy
