

My Private Movie

Westlife

Yeah, check it out
Pretty girls are all around, I'm looking up and down
Tonight we'll find her, find you in the sun
Someone to fill the frame, you've been driving me insane
And the way you're acting's telling me you feel the same
Everything you do, everything you see
Somehow your body is working for me
Take after take watching every move you make
There's only one thing that's been said
Picture me all over you, picture you all over me
Baby you're the star of my private movie
You're stealing the love scene right out of my dream
We'll see the sun come out the violins are playing
Girl, we're making love in my private movie
Check it out, cut to a desert house
Surrounded by a deep blue sea
Fade to a picture of your lips kissing me
Waves are crashing as our love runs free
Let the rhythm take us from here to eternity
Oh baby can we make this real
Autograph my heart 'cause I know how you feel
'Cause you know its true girl, you're my fantasy

There's only one thing missing
Picture me all over you, picture you all over me
Baby you're the star of my private movie
You're stealing the love scene right out of my dream
We'll see the sun come out the violins are playing
Girl, we're making love in my private movie
Since I saw your face, I've never been the same
Now it's only you I think of slow motion frame by frame
Picture me all over you and all over me
Baby you're the star of
Picture me all over you, picture you all over me
Straight I love my private movie
You're stealing the love scene right out of my dream
Picture me all over you, picture you all over me
Baby you're the star of my private movie
You're stealing the love scene right out of my dream

We'll see the sun come out the violins are playing
Girl, we're making love in my private movie
My private movie
My private movie
My private movie
