Nothing Between Us

Sense Field

I've kept myself down
We can say that I did not know that I help you to build
This house with the love of everyone and the love ofEverything I talk to you for hours
And I still lose to myself when I'm with you
I watch you swing and I watch your body shifting
I know that look, I know this feeling
You've seen me like this beforeWhat would you like me to do?
What would you like? I want to
I think I know what you need to hear
No we don't have to say, no need to say a thingThere's nothing between you and me
There's no need to say anything
There's really no need to explain
Let me just say I love thisWith your hair, wet your body trying to dry
These heavy eyes, these restless hands
The little lights go around the room
With your weight on me, will you wait with meAnd I know of a place where we can go
Perfectly designed for every more
Exactly written with every word
And the talk of the after lifeThere's nothing between you and me
And I swear that you swore that you know you'd talked me into it
And we didn't know we could even get this close
No we don't have to stay, no need to say a thingThere's nothing between you and me
There's not need to say anything
No we don't have to stay, no need to say a thingThere's nothing between you and me
There's no need to say anything
No we don't have to stay, no need to say a thing
No need to say a thingThere's nothing between you and me
There's no need to say anything
There's really no need to explain
Let me just say I love this me with you
Me with you, me with you
