ItÂ’s Alright

Revolver

There's nobody here
You can't feel a thing
Your mind blows away with the wind
And it's alright

You should be prepared
You know how it feels
To talk to yourself every night
And it's alright

You can sing a thing
You can write a line
That you didn't read someplace else
And it's alright

You don't know your ma
You don't know your pa
You don't know your friends or yourself
And it's alright

'cause you'll always be like everybody else, baby
No matter what you say or do
You'll always be part of a social circus
And it's alright
That's all you know

Every bridge will burn
Every deal is late
Every story's been told before yours
And it's alright

Every bridge will burn
Every deal is late
Every story's been told before yours
And it's alright

You'll always be like everybody else, baby
No matter what you say or do
You'll always be part of a social circus

And it's alright

That's all you know
It's alright
That's all you know
It's alright
That's all you know
It's alright
That's all you know
It's alright
