Lock Us Away

Naked Aggression

Don't support the war on crime
Innocent people are doing time
More an more cops and jails
This solution to crime is going to fail
Don't you see what they're trying to do
They're not concered with your safety
They want to control you, congress passes
More oppressive laws then they lock us awayWallstreet perpetuates poverty then they
Lock us away the media creates hysteria then
They lock us away soon the whole country will
Be under martial law then they'll lock us all away
People have always been the same there's always
Been assholes who should be locked away such as
Murderers, rapists, and all the politicians
But now there's people getting locked
Away for no reasonIncarceration and the death penalty
Do nothing to reduce crime it distracts us
From fighting the social conditions
Which create this insane violence
Such as poverty and racism and sexism
And homelessnessThe only way to fight against crime
Is to put human needs before profit
Don't support the war on crime
Innocent people are doing time
We're denied healthcare, education, and housing,
Domestic violence and child abuse are never ending
But none of these artrocities are seen as crime
Neither is sending someone off to war to die
