

Harder

[Kosheen](#)

I should have treated you a bit warmer
Kept you over here in my corner
After all is said and done
You still got me on the run a bit longer
Every day and night I wish I had tried
A bit harder I should have tried a little bit harder
I should have tried a little bit harder Looking back I could have been smarter
Maybe given time we could get it together
I've got memories of our time
Playing over in my mind and I cannot forget
I wish I could make it right
Maybe if I could turn back time
We could have made it if I tried, if I tried I should have tried a little bit harder
I should have tried a little bit harder I couldn't meet with your demands
So much I don't understand
All the good things that we had
Slip like water through our hands
Was I blind that I didn't see
That you needed more from me
How much we had to cry
We could make it if I try I should have tried a little bit harder
I should have tried a little bit harder
I should have tried a little bit harder
I should have tried a little bit harder
