

One Hot Minute

Red Hot Chili Peppers

I was riding, riding on my bike
Me with my friend we're so alike
Am I all alone She said all we have is this
We just had to stop and share a kiss
Am I all alone One hot minute and I'm in it come and get it
One hot minute and I'm in it come and get it
One hot minute and I'm in it come and get it If I chase it I might waste it
Come and spit it
Am I all alone, am I all alone Sitting in the fire, I get along and have some fun
Floating to be higher, oh, maybe I'm your special one
Silent testifier, I'll breathe the moon
And eat the sun, sitting in the fire Close your eyes and click your heels
Can you believe how good it feels
Am I all alone One hot minute and I'm in it come and get it
One hot minute and I'm in it come and get it
One hot minute and I'm in it come and get it If I chase it I might waste it
Come and spit it
Am I all alone, am I all alone Sitting in the fire, I get along and have some fun
Floating to be higher, oh, maybe I'm your special one
Silent testifier, I'll breathe the moon
And eat the sun, sitting in the fire Say goodbye to where you got it now
Pay your father, pay your twenty, take a bow
Say goodbye to where you buy you got it now
Pay your mamma, pay your father take a bow
Say goodbye to where you buy you got it now
Pay your father, pay your twenty, take a bow Three pounds of love inside my skull
A million more lives it's never dull
Just a few times spun, spun around the sun
A couple more or less and then we're done Sitting in the fire, I get along and have some fun
Floating to be higher, oh, maybe I'm your special one
Silent testifier, I'll breathe the moon
And eat the sun, sitting in the fire
