

# River - Acoustic Version

## Lights

Out across cities I see buildings burn into piles  
And watch the world in wonder as mountains turn into tiles  
And trees losing their leaves and faces becoming tired  
I wish I could discover something that doesn't expire  
Come and stumble me

[Chorus]

Take me river carry me far  
Lead me river like a mother  
Take me over to some other unknown  
Pull me in the undertow

Such are the things that make a kingdom rumble and shatter  
The same dynamic that another day would never matter  
It really just depends on who's giving and who's receiving  
And things that don't make sense are always a little deceiving.  
Come and humble me

[Chorus]

I wanna go where you're going  
A follower following  
Changing but never changed  
Claiming but never claimed

[Chorus: x2]
