Worlds Align

COPIA

Can we find a way
To edify the cause
Of the cycles in existence
That reappear

Why are we holding on
To the echoes in the distance
Never letting go
Won't let go

'Cause our worlds keep aligning
As the gravity pulls us in
Out of the chaos we'll unify
Leaving our past behind

After the rain will come the sun
To dissipate the mist surrounding us
But the sun never seems to shine for too long
And we're right back where we started
Questioning where it all went wrong
Taken away from all this peril
We're shifting our direction
And never letting go
Won't let go

We can break down these walls
We've built around us
I will confide in you
Never let go
I will confide in you
Never let go
