

How Could I Help but Love You

[Aaron Neville](#)

When you hold me close, honey
You're the most, baby, you set my soul on fire
Ever since I met you, honey, I had to get you
You have been my one desireHow could I help, but love you with a love so true?
You send cold chills down my spine
If we would ever part, it wouldn't be your fault
Yeah, it would be all mineIf you would ever leave me, honey
It sure would grieve me, baby, it would break my heart
But I won't let that worry me, this love will always be
It was meant right from the startHow could I help, but love you with a love so true?
You send cold chills down my spine
If we would ever part, it wouldn't be your fault
Yeah, it would be all mineWhen you hold me close, honey
You're the most, baby, you set my soul on fire
Ever since I met you, honey, I had to get you
You have been my one desireHow could I help, but love you with a love so, so true?
You send cold chills down my spine
If we would
