9 Shades Of Red

Hedley

where did i go so wrong
singing the same sad song
sittin home all alone saying woe is me
la la la la la la la
so now i'm callin all of my friends
and this is where the fun begins
what would it to take to afford a little break from the boredome little
ha ha ha ha
holler back for a planed attack on this unsuspecting town
we may be looking pretty but we make an awful sound
it's you and it's me and that's all we'll ever need
and yah we'll tear up the streets and we'll dance until we bleed
and then we'll sleep when we're dead cause we'll take over this town
and paint it 9 shades of red getting down is what we're up to tonight
and now security is having a fit
cause nobody is giving us shit
and as the party gets cloudy yeah we start to get rowdy
screamin rah rah rah rah rah
and if we gotta deal with the cops
try to shut us up and say the fun stops
god we gotta keep grooving while your mouth keeps moving mr blah blah blah blah
holler back for a planed attack on this unsespecting town

we may be looking pretty but we make an awful sound
it's you and it's me and that's all we'll ever need
and yah we'll tear up the streets and we'll dance until we bleed
and man we'll sleep when we're dead 'cause we'll take over this town
and paint it 9 shades of red getting down is what we're up to tonight
so now were gonna get up and shout
until everybody kicks us out
or till the lights come on and all the fights go on
its what we're all about
so now were gonna get up and shout
until everybody kicks us out
or till the lights come on and all the fights go on
its what we're all about
well it's you and it's me and that's all we'll ever need
and yah we'll tear up the streets and we'll dance until we bleed
and man we'll sleep when we're dead yah we'll take over this town

and paint it 9 shades of red getting down is what we're up to
well it's you and it's me and that's all we'll ever need
and yah we'll tear up the streets and we'll dance until we bleed
and man we'll sleep when we're dead yah we'll take over this town
and paint it 9 shades of red getting down is what we're up to tonight
