

Shine

[Rosi Golan](#)

This life is light, It's light burns bright
So we'll take it day by day and let it be
And everyone will see how good it feels
Oh they'll see the world for all that it could be
Let the sunlight in, I wanna feel it from within

You spin me around and make me feel like I could Shine, shine.

So what do you say if the sky turned grey?
With a kiss you'd send the rainclouds on they're way
This life is light, it's light burns bright
Every moment is a moment you could say
