

# Everything Is Alright

[Tomi Swick](#)

After all of the things we've been through  
I think I know enough to say I know you  
I see that you want to hear me  
I know that you care Everything is alright if you want it to be  
Everything is alright with me  
So take your time before you set your mind  
To make things right If it's time that you need, I'll give it  
And if it's the wine that's my greed, I'll admit it  
I see that you want to hear me  
I know that you care Everything is alright if you want it to be  
Everything is alright with me  
So take your time before you set your mind  
To make things right, to make things right  
To make things right, to make things right Everything is alright, everything is alright  
Everything is alright, everything is alright  
Everything is alright, everything is alright  
Everything is alright, everything is alright
