Poison The Waters

The Duskfall

Take a sip of this my friend
a little grey water won't hurt
A sample of your own mistakes
the more destruction, the higher the stakesClimb down from your pediestal
if you can't show us how to act
A little suffering is all it takes
and you have so much to gainDrain the world from what it's got
let the inhabitants drown in your sewage
thirst for moreStretch out to the heavens
and pull it downNo antidote for your followers
greed survives lives morals
Your love fills up graveyards
and let children starve in their cradles
