## **If Flowers Turn**

## <u>Ours</u>

Flowers for a girl who was placed in the dark Flowers from a world that had taken her heart They looked so pretty, but the blood stained themIf flowers turn throw them away, throw them away If flowers turn throw them away, throw them awayPull the braids untie of the pain from your hair Don't let the buzzards try or they'll take what's been there Signs appear, and the worst you fearIf flowers turn throw them away, throw them away If flowers turn throw them away, throw them awayDon't look to the dark all of the pain that you want is here Uncover your heart so the feeling can disappear The worst winds are calling they need you they want you I'm in the dark and I can't see a thing for milesIf flowers turn throw them away, throw them away If flowers turn throw them away, throw them away, throw them away If flowers turn throw them away, throw them away. If glowers turn throw them away, throw them away If glowers turn throw them away, throw them away. The worst winds are calling they need you they want you
