

Love Will Follow

Kenny Loggins

I run out of breath and start to shake
I love you with all my heart can take
I hold you beside me in my sleep
And long to be dreaming endlessly We've come into a place in time
Where I am yours and you're mine
A circle filled with love If you come away with me
I can show you ecstasy
Close your eyes and we will lead
And love will follow Take a chance and hold my hand
I know you'll understand
We'll find a special land
And love will follow, ho baby
Hey hey A smile on your lips and in your eyes
A stranger adrift in paradise
You touch me and slowly move away
Take all of the night you need to take Just wait a little while and see
What you mean to me
I've waited all my life If you come away with me
I can show you ecstasy
Close your eyes and we will lead
And love will follow Take a chance and hold my hand
I know you'll understand
We'll find a special land
And love will follow If this was just a chance of make-believe
You'd never feel it this way
I've always wanted to love somebody
As much as I'm, I'm wanting you now We've come into a place in time
Where I am yours and you're mine
A circle filled with love If you come away with me
I can show you ecstasy
Close your eyes and we will lead
And love will follow Take a chance and hold my hand
I know you'll understand
We'll find a special land
And love will follow Oh my girl, I swear I love you so
Tonight you're gonna know
And everywhere we go
Love will follow Use your wings and fly away
And come with me today

Tonight will lead the way
And love will follow I keep holding on, all night long
Is where you belong, my baby
Holding on Holding on, all night long
Is where you belong, my baby
Holding on Holding on, all night long
Is where you belong, my baby
Holding on Holding on, all night long
Is where you belong, my baby
Holding on
