

# Like Lamotta

## Emmure

Do you really wanna know?  
[?] all alone at the top of the food chain  
When I'm up there standing in front of cameras  
A thousand eyes staring at you hoping you fall  
I was made for this, I know the sound of glory calling and I couldn't resist  
From what I've learned of the years  
of ups and downs  
The whole game can change just when you figure it out  
So let me give you, a little piece of advice  
Just be yourself kid, the rest will fall into place  
Like LaMotta, I'm only here to tell you, you better save yourself  
Like LaMotta, I'm only here to tell you, you better save yourself  
When did it start? Let me begin  
Chapter 1 page 1, are you listening?  
I wanna bring you back to the streets  
Passing out my fucking demo for free  
Passing fliers when it's 20 degrees  
To promote my show  
That's some shit you knew, just will never fucking know  
Yeah that's some shit you knew, just will never  
fucking know  
From what I've learned of the years of ups and downs  
The whole game can change just when you figure it out  
So let me give you, a little piece of advice  
Just be yourself kid, the rest will fall into place  
Like LaMotta, I'm only here to tell you, you better save yourself  
Like LaMotta, I'm only here to tell you, you better save yourself  
Like LaMotta, I'm only here to tell you, you better save yourself  
Like LaMotta, I'm only here to tell you, you better save yourself  
You better save yourself  
I'm only here to tell you, you better save yourself
