Show I Love You

[Dejour](...)

Baby, It's Dejour
Baby.
I don't need to touch you, no
I don't need to hold you close.
I don't need to show you love,
by making love.
I don't need to touch you to show you I love you
I don't need to kiss you to show you I care
all I got to do is be a friend to you
my love will always be there
I don't need to hug you to show you I need you
baby girl my love won't disappear
all I got to do is be a friend to you
girl my love always be there.

girl I know you know I love you
I tell you all the time
so don't cry whenever I don't call
doesn't mean you not pon my mind
baby let my love surround you
prove my love is true
I don't have to show I love you
by touching you

I don't need to touch you to show you I love you
I don't need to kiss you to show you I care
all I got to do is be a friend to you
my love will always be there
I don't need to hug you to show you I need you
baby girl my love won't disappear
all I got to do is be a friend to you
girl my love always be there.

After all this time
I finally realise
that I can make sweet love to you
by staring in your eyes

there's more to love than touching
it's more than kissing and hugging

it's a connectivity
and it connects you and me

I don't need to touch you to show you I love you
I don't need to kiss you to show you I care
all I got to do is be a friend to you
my love will always be there
I don't need to hug you to show you need you
baby girl my love won't disappear
all I got to do is be a friend to you
girl my love always be there.

touch you
kiss you
hold you
squeeze you
show you I need you baby

touch you (i dont need to touch you)
kiss you
hold you (i dont need to touch you)
squeeze you
show you I love you baby yh

I don't need to touch you to show you I love you
I don't need to kiss you to show you I care
all I got to do is be a friend to you
my love will always be there
I don't need to hug you to show you I need you
baby girl my love won't disappear
all I got to do is be a friend to you
girl my love always be there.
