Telescope

Lennon Stella & Maisy Stella

Yeah,

Wonâ€TMt do no good, if you run from me There ainâ€TMt no cheatinâ€TM, scheminâ€TM my heart donâ€TMt see You left your troubles in my head, in my head You left your secrets in my bed, in my bed Youâ€TMre like the cover of a book thatâ€TMs been read, baby I know what line is coming next, coming next

Chorus:

You canâ€[™]t hide from me, There ainâ€[™]t no tricks that you can try on me I know your every move before you even breathe baby Thinking you know something I donâ€[™]t know But my eyes, my eyes, my eyes are like a telescope

Youâ€TMre kissing her, when my head is turned You must be crazy baby, havenâ€TMt you learned? You canâ€TMt deceive me silly child, silly child I donâ€TMt believe that greedy smile, greedy smile My intuition can see for miles and miles baby Every little sin, and everywhere youâ€TMve been

Chorus:

You canâ€[™]t hide from me, There ainâ€[™]t no tricks that you can try on me I know your every move before you even breathe baby Thinking you know something I donâ€[™]t know But my eyes, my eyes, my eyes are like a telescope Yeah, yeah

You left your troubles in my head, in my head You left your secrets in my bed,

Chorus:

You canâ€[™]t hide from me, There ainâ€[™]t no tricks that you can try on me I know your every move before you even breathe baby Thinking you know something I donâ€[™]t know But my eyes, my eyes, my eyes are like a telescope You can't hide from me, There ain't no tricks that you can try on me I know your every move before you even breathe baby Thinking you know something I don't know But my eyes, my eyes, my eyes are like a telescoá¹—e
