## **Understanding**

## **Xscape**

What I need from you Is understanding

How can we communicate

If you don't hear what I sayWhat I need from you

Is understanding

So simple as 1, 2,3

Understanding is what we needYou don't really know me

You just wanna do

What you wanna do

That's not the way it should be No, you should listen to me boy

I try so very hard to make you understand

But the choices you make

Baby, they're all demandsI try so very hard to keep our love alive

But you don't wanna meet me half way

Then the understanding diesThere's no way that we can work it out

If we don't pull together

I don't mean to be demanding

But I want some understanding

I wanna be with youWhat I need from you

Is understanding

How can we communicate

If you don't hear what I sayWhat I need from you

Is understanding

So simple as 1-2-3

Understanding is what we needI listen to you, baby

And I know the things

You're going through

I try to understand

That's why I'm still here with you,babySee everyday we're living

Is one thing that will always be unsure

That's why I need you baby, pleading, baby

Please let our love endureI try so very hard to keep our love alive

But you don't wanna meet me half way

Then the understanding diesThere's no way that we can work it out

If we don't pull together

I don't mean to be demanding

But I want some understanding

I wanna be with youWhat I need from you

Is understanding

How can we communicate

If you don't hear what I sayWhat I need from you

Is understanding

So simple as 1-2-3

Understanding is what we needI try so very hard to keep our love alive But you don't wanna meet me half way

Then the understanding diesThere's no way that we can work it out

If we don't pull together

I don't mean to be demanding

But I want some understanding

I wanna be with youWhat I need from you

Is understanding

How can we communicate

If you don't hear what I sayWhat I need from you

Is understanding

So simple as 1-2-3

Understanding is what we needWhat I need from you

Is understanding

How can we communicate

If you don't hear what I sayWhat I need from you

Is understanding

So simple as 1-2-3

Understanding is what we need
