

I Call Your Name

Willy DeVille

All through the night
The morning's the same as the evening
Day after day
When will these feelings leave me
I'm lonely through my life

I know it's not right
But we were made for each other
These feelings remain
Must I go out without you
Lonely through my life?
Can this go out forever,
Must this go out forever?

I call your name
And still I get no answer
And still I get no answer.

In those shadows of night
That still know but us together
We only kissed once
A kiss that been mean forever
Lonely through my life

You say out no shame
What I can live, but show me
As time passes by
Willing for you to take notice
Lonely through my life
Will I wait how much longer
Should I wait how much longer

I call your name,
I call your name
