

# Keep Driving

## Woodale

We'll take the long roads  
Off into the world where no one goes  
We'll pick the right songs  
Cause I believe these roads were meant for us  
Keep driving till there's no where left to run  
Can't help but think there's something there for us  
Keep driving away  
Keep driving away  
We'll take the slow roads  
Deep into the woods where no one goes  
We'll pick the slow songs  
Cause I believe these roads were made for us  
Keep driving till there's no where left to run  
Can't help but think there's something there for us  
Keep driving away  
Keep driving away  
With a long way from  
Where we first saw  
There's too much here  
The world can't say we're wrong  
And even when the roads begin to disappear  
We won't forget what brought us here, no  
We'll still go  
We'll take the long roads  
Off until the world where no one knows  
We'll pick the long songs  
Cause I believe these roads were made for us  
Keep driving till there's no where left to run  
Can't help but think there's something there for us  
Keep driving away  
Cause i believe these roads were made for us  
Keep driving till theres no where left to run  
Can't help but think there's something there for us  
Keep driving away  
Keep driving away  
Keep driving away  
Keep driving away
