

# Lovesick Teenagers

## Bear in Heaven

Looking to the right,  
a turn goes by  
but not for too long  
Our destination  
By your misfortune  
We are pulling past  
Hurtling out

But not for too long  
So just embrace it  
Our destination  
Dragging away from the high road  
We should find a flock of birds big enough  
to pull us up from the long road  
Come on. Come with us.

We are falling straight down so don't lose hope

Land on the earth before we crash into the ground.  
Lovesick teenagers don't ever die.  
They will live forever  
Even when you're too old.  
And you think you're no more.

And you know you're no more. You'll be  
Dragging away from the high road  
We should find a flock of birds big enough  
to pull us up from the long road  
Come on. Come with us.

We are falling straight down so don't lose hope

Land on the earth before we crash into the ground.  
Dragging away from the high road  
We should find a flock of birds big enough  
to pull us up from the long road  
Come on. Come with us.

We are falling straight down so don't lose hope

Land on the earth before we crash into the ground.
