

Everything Is Happening

Mother Mother

Her baby bird with brand new with wings
A little girl on the playground swings
The elderly will lose their teeth
And little old me i lost my keys
Ohhh i stay inside to watch tv
Where the anchor lies about the middle east
Where the prophets cry for old barry
Because the romans died but it didnt dim me Everything is happening, everything is happening
at the same time
But if you listen close enough you might find
Listen close enough and you'll hear the world cry A black star falls into the sea, to make room for the next
prodigy
'Cause there's a genius boy in a basement suite
with digital toys and a symphony
Oh what about me
Yeah what about me
Yeah man what about me
and my rock and roll dreams
Oh what about them in the factories
who never sleep, who never dream Everything is happening, everything is happening
at the same time
But if you listen close enough you might find
Listen close enough and you'll hear the world cry And the america's are hooked on drugs
And the government is run by thugs
If there's a god above he's not enough
But I don't care 'cause I'm in love Ooohh ahhh ooh ahhhhhhh Everything is happening, everything is happening
at the same time
But if you listen close enough you might find
Listen close enough and you'll hear the world cry And everyone is speaking up aw yeah
Everyone's just spending their time the same time
But if you listen up enough and shut our mouths
Listen up enough we might hear the world sigh?
