With A Little Love

Level 42

Would you like to see a world where no one ever hurts
Live among a people where compassion is the word
Never see the tears of a thousand children falling on the dirt
Never hear the cry of a nation's people who's voice will not be heard
Calling out an engineer to save the planet earth
Calling all the dreamers who can help me build a world
Don't want it, don't want it, don't want it
Don't want it, don't want it, don't want it
Listen to the voices of a God before your time
It has all the answers to the questions you might find
With a little love the hardest heart can be opened to the light
With a little love the darkest heart can be opened to the light
With a little love
Calling out an engineer to save the planet earth
Calling all the dreamers who can help me build a world
Don't want it, don't want it, don't want it
Don't want it, don't want it, don't want it
With a little love, with a little love
With a little love, with a little love
