## Exhumed

Advisory - the following lyrics contain explicit language:

Admiring the syphilitic visage, Of the pustule ridden genitals that I adore,  
Oozing sebum and pus dribbling on the labia, Leaves me panting for more...  
Vaginal excrements fume and funk, The stench of festering menstrual discharge,  
The wafting odor tortues my nasal passage, The glistening cunt wet with  
blood... A crust ridden musty flap of lust suffering, From severe  
dermatological disorder, The sanguined slit lined with papules, And genital  
warts along its fleshy borders... Licking the sickening twat, The foul stench  
of the blistering crotch, Drinking the menstruated slop, Delight in each  
pustular drop... Passing blood clots, Eating crotch rot, Septic blood and pus,  
Consume the runny crust, Urine flows out of the slit, Piss washes over the  
clit, Taste the blood and piss, Nothing compares to this... My face fully  
buried within, The pubic mound of grime and warts, Voraciously lapping up  
excrements of, Every sordid type and nauseating sort... The atrocious  
nauseating odour, Proves too strong to resist in the end, The nauseating fumes  
overwhelm me, As I vomit into the moist pungent gash... Regurgitate onto the  
cunt, Puke on the gore ridden slut, Drunk off the urine flow, I bathe in the  
afterglow...
