One

Ed Bruce

If you want to hear a love song, I could sing one
If you wanna feel the fire, we could build one
If you need to catch a rainbow, we could chase one
If you want to be together, we could be oneOne and one, I've always heard adds up to two
But one and one is only one when that one is me and you
If you believe in forevers, we could start one
If you want to be together, we could be oneNow you talk about tomorrows, I can see one
There's no mountain we can't climb if we reach one
If you believe in forevers, we could start one
If you want to be together, we could be oneOne and one I've always heard adds up to two
But one and one is only one when that one is me and you
If you believe in forevers, we could start one
If you want to be together, we could be one
If you want to be together, we could be one
