

# Before the Winter

## Stratovarius

Before the summer turns to winter  
Before the dreams will turn to snow  
I see the yellow leaves are falling  
And soon I know I have to go But I'll be back before the summer  
Next year you're in my arms again  
The winter breeze will send my message  
It will keep you warm until then The path to home is long and winding  
I'll keep the flame alive for you until I am back  
You and I will walk that road together  
I'll show that all the dreams are true If you only let them be before the winter  
Before the summer turns to winter  
Before the dreams will turn to snow  
I see the yellow leaves are falling And soon I know I have to go  
The path to home is long and winding  
I'll keep the flame alive for you until I am back  
You and I will walk that road together I'll show that all the dreams are true  
If you only let them be before the winter
