Stumble

Second Class

sometimes when you're around i can't remember what day it is and sometimes when i see you smile my knees start to quiver and they almost give and i don't think you know if you did it would never show and i stumble on my words when i'm around you you don't know all the things that you put me through sometimes i feel i could look at you for hours til i fall asleep and sometimes when i feel strong you have the power to make me weak and my biggest fear is that you're a dream someday i'll wake up and i stumble on my words when i'm around you you don't know all the things that you put me through sometimes you are all i see sometimes you are all i need i stumble on my words when i'm around you
