

Spirit of a New World

Earth, Wind & Fire

We wake from a dream looking through
different eyes
Some other space and time
Where love survives all the changes
Time takes you and I into another life
Burn in our hearts of fire
A new design, we are changing Let the spirit of a new world
Keep our love alive
In the spirit of a new world
We're in overdrive Believe all that we feel
Living a future dream
Open our eyes to see technology
Our direction Let the spirit of a new world
Keep our love alive
In the spirit of a new world
We're in overdrive Step into the dance
We step into the dance of life
Ride the rhythm take a chance
We can make the spirit rise Reach out there's a new world we created
Break out, hear your heart shout
You can make it
