I'm Learning to Love Her

Charley Pride

Last night I walked down that little country lane
And a million memories ran through my mind
Where I used to walk with you now I walk with someone new
And I'm learning to love her with time
Yes I'm learning to love her cause you've gone and found another
It's the only way I know to ease my mind
She's not you but she loves me and I know she'll stay with me
And I'm learning to love her with time
[piano]
Well over there that old oak tree where you gave your love to me
It was here you said I'll love you for all time
But tonight she's here with me and she loves the hurt away
And I'm learning to love her with time
Yes I'm learning to love her...
Yes I'm learning to love her with time
