

Scarlet

Delain

Like a flower, grows on intentionally towards the sun
I grow towards the one that hurts me most
And like a razor follows upon command
Follows a guiding hand that's made to push the blade
And I know that if I wore to save the day
I know it's not my victory
I'll just sit here with my golden smile
And if you wore to save the world
You know it's not a day for heroes
You just sit there with your empty eyes
And scarlet heart, and scarlet heart
Like forever, caught in a memory
Do you remember life before you shut the door on me?
And like whenever you want a safe return
I'll be here wait with open arms to keep you safe from harm
And I know that if you wore to save the world
You know it's not a day for heroes
You just sit there with your empty eyes
And I if we wore to save the day
We know it's not our victory
We'll just sit here with our golden smiles
And scarlet heart, and scarlet heart
And the curtain falls for all
And the curtain falls for all
And the curtain falls for all
And the curtain falls for all
And the curtain falls for all
And the curtain... fall for all
Like a flower, grows on intentionally towards the sun
I grow towards the one that hurts me most
