Brand New World

Noah Gundersen

Her mother was sailor lost at sea
Maybe you could say no less of me
Looking for answers that never come
We survived the season of the rain and snow
Talking about places that we'd like to go
We'll pray in California and the summer sun

It's a brand new world
It's a brand new world
So settle down young boy, relax
And settle down young boy
get that load off your back
Settle down young boy, the winter is over
It's all just beginning
It's all just beginning here

Her father was a coward with a monkey's tail
He's spitting on the flowers at the gates of hell
I've been picking daisies by the carousel
She kissed me as the silence turned to rain
And just as it will be and has always been
I'm bagging up the cash as the cops rush in

It's a brand new world
It's a brand new world

And as the light of the moon
Turns to the sunny side of April
We will run, we will run

So settle down young boy, relax
And settle down young boy
Get that load off your back
Settle down young boy, the winter is over
It's all just beginning
It's all just beginning
It's all just beginning here
