

Take Me In the Night

Blondie

I live all day
To take some inspiration from the things you said
You look good it's true
You are are drenched in booze, so right to dance with you
Take me in the night, night, night, night
Vision so bright, bright, bright, bright
Not asking for love, love
Just a kiss like you're still alive
Take me in the night, night, night, night
It's like you never died, died, died, died
We could still shine like when you were here
Like you're still alive
Hey - Here comes the line
The one that draws you to me
For my whole life
Take what you will
Destroy the rest & never speak of it again
Take me in the night, night, night, night
Vision so bright, bright, bright, bright
Not asking for love, love
Just a kiss like you're still alive
Take me for a ride, ride, ride, ride
It's like you never died, died, died, died
We could still shine like when you were here
Like you're still alive
This is our, our universe
We don't rehearse
It's not our first
This is our, our universe
Life in reverse
It's not our first
Take me in the night, night, night, night
Vision so bright, bright, bright, bright
Not asking for love, love
Just a kiss like you're still alive
Take me for a ride, ride, ride, ride
It's like you never died, died, died, died
We could still shine like when you were here
Like you're still alive
