

# Corseting

[Atreyu](#)

Just swallow the pill, think of me no longer  
Just let go and take yourself out  
Oh right out, before I kill you too, aren't you tired of me  
Fucking you, fucking you over and over? You were the last person I wanted in my sights  
And my heart honestly breaks when I think of you  
I understand now what 'I love you' means  
It's doing the right thing no matter of the consequence I'm tying you up, using the nicest lace  
Trying to kill you softly, trying to erase your face  
All the while I'm doing my best not to  
Rub my love up against your head I'd redecorate the walls with your inner thoughts  
But I'm afraid it's the wrong shade of red  
But I have these sadistic urges  
And I don't want to take it out on you I'm tying you up, using the nicest lace  
Trying to kill you softly, trying to erase your face Right now you're the only one  
Who understands my plight  
Right now you're the only reason  
I can't sleep through the night
