Fuel the Fire

Mendeed

Total insanity
We are falling into nothing
We're at war this war evermore
We wont be the same
We are sinking into silence
We are feeding from the liars
To the end of the earth
We march unto this warTake your laws of life and rewrite them
Nothing that you say is the truth you're vile
I've seen it all in the eye of deceitful
Pray you live tonightFuel the fire raging through us all
I can taste the sick inside I'm promising you I wont take this
My hatred grows
Fuel the fire if you dare I will not stand you as dictatorWe wont taste defeat
