Only Way

An Early Ending

Don't tell what you think about this and what i should be
I am learning how to live
I'll never be the way you are
I'm gonna climb this now straight to the top
And then we're never gonna stopDestroy the past
I'll do everything i canWe can not hide our face tonight
In all our shame
This is our hope for tomorrow
It's the only wayYou don't impress me
You think you're everything to everyone
But you mean nothing to me now
Keep your mouth shut and swallow your pride
Because we're alone for the same ride
I carry myself all alone
It's not too late
To make a better change
