Eastern Glow

The Album Leaf

One by one
We force ourselves
Turn it on
It comes in wavesTry to find
Maybe this time
Don't turn your head
it's easy to forget how we wereOnce inside
We've made it here
We struggle with the lights
They never go awayWhat have we learned
It's the same old things
That drive us here
And never go away
We are changedThrough the tides
Make your way
You'll find the time
A comfort insideHere I wait
In the safe place
Where we were so many years ago
So many years agaOne by one
We close our eyes
And return to that place
As a thousand nights go byOne by one
We close our eyes
And return to that place
And a thousand nights went by
