

# Eastern Glow

## The Album Leaf

One by one  
We force ourselves  
Turn it on  
It comes in waves Try to find  
Maybe this time  
Don't turn your head  
it's easy to forget how we were Once inside  
We've made it here  
We struggle with the lights  
They never go away What have we learned  
It's the same old things  
That drive us here  
And never go away  
We are changed Through the tides  
Make your way  
You'll find the time  
A comfort inside Here I wait  
In the safe place  
Where we were so many years ago  
So many years ago One by one  
We close our eyes  
And return to that place  
As a thousand nights go by One by one  
We close our eyes  
And return to that place  
And a thousand nights went by
