

Lights Off

Avant

Ain't my fault but it was overdue
I spent countless days and nights just tryna get to you, girl
When all else failed
I went out of my way
Cuz a few times spent with you, girl it was so amazing I've been around the world
We spent days apart
But I knew when we linked up
I'm the one that could change your heart
We were making love
It was so sincere
I remember when she told me She love it when the lights off
She was afraid of the dark
But I'm the one that turned her on when I'm around
She love it when the lights off
She was afraid of the dark
But I'm the one that turned her on when I'm around
Now she love it when the lights off I ain't 'bout to talk baby
This is real for me too
That's why I do what I do
Just to get next to you, yeah
Don't take it off baby
Make it feel brand new
You can do just what you like
Baby, I'm all yours tonight
I've been around the world
We spent days apart
But I knew when we linked up
I'm the one that could change your heart
We were making love
It was so sincere
I remember when she told me She love it when the lights off
She was afraid of the dark
But I'm the one that turned her on when I'm around
She love it when the lights off
She was afraid of the dark
But I'm the one that turned her on when I'm around
Now she love it when the lights off
