THE CATALYST

UNDIVIDE

I am on your side
You light me up inside
You fill my eyes with stars
It doesn't get me very far
Just look around
You don't need no fairy tale to get you by
Just look around
You don't need no Santa Claus
You don't need to make things up
But if there's something more than this
I'll meet you sucked inside a kiss
And if there's something more to this
Then I will be the catalyst
I wish I could say something beautiful to
Make you fall in love again
But love has slowly faded away like
Spotlights shining in to space
I am on your side
You light me up inside
You fill my eyes with stars
It doesn't get us very far
Just look around
You don't need no fairy tale to get you by
Just look around
You don't need no Santa Claus
You don't need to make things up
But if there's something more than this
I'll meet you sucked inside a kiss
And if there's something more to this
Then I will be the catalyst
I wish I could say something beautiful to
Make you fall in love again
But love has slowly faded away like
Spotlights shining in, spotlights shining in to space
Just look around
You don't need no government to get you by
Just look around
You don't need no Santa Claus
You don't need to make things up

But if there's something more than this
I'll meet you sucked inside a kiss
And if there's something more to this
Then I will be the catalyst
I wish I could say something beautiful to
Make you fall in love again
But love has slowly faded away like
Spotlights shining in, spotlights shining in to space
