System Breakdown

Tendead

System breakdown
Were running on the other side of hell
No religion
You know that we are not designed to failAnd when its over, well all turn into flames
Without a name
It doesnt matter, cant you see were all one flame
Without a nameDegradation its running down and back across your skin
No creation, its feeding in upon your only sinAnd when its over, well all turn into flames
Without a name
It doesnt matter, cant you see were all one flame
Without a nameWhen consciousness ends, did we ever really have a soul
Does it matter if we fall back into the holeSystem breakdown
You know that we are riding toward the end
My salvation is waiting for me when will it beginAnd when its over, well all turn into flames
Without a name
It doesnt matter, cant you see were all one flame
Without a nameWhen consciousness ends, did we ever really have a soul
Does it matter, if we fall back into the hole
