

# My Knight In Black Leather

Bette Midler

Time 2:15, the AM

Place Ronardo's "Boom-Boom-Room" on South Street

I'm a hot blond and it was a cold night

This is my story. I ain't ashamed to tell it

I was hungry, tired and lookin' for love I was just a pilgrim in the hot pursuit of love

Wandered from disco to disco, that's all my life was

Suddenly you danced up against me

It felt warm and smooth, I knew in an instant

You were my moment of darkest truth Oh, my knight in black leather

Hold me tight and love me forever

Rings on your fingers, love in your heart

Knight in black leather, we'll never part Only you can shine the light on the dark side of my mind

And your evil sweetness leaves a trail of lovers behind

When you crush me to your heart

I feel just like a queen, I'm a willing victim

Tell me, all my life where have you been? Oh, my knight in black leather

Hold me tight and love me forever

Rings on your fingers, love in your heart

Knight in black leather, we'll never part Oh, my knight in black leather

Take me down and love me forever

Walk on through the halls of my soul

Knight in black leather and you've got control

Oh, don't you know, baby? Oh, my knight in black leather

Take me down and love me forever

Rings on your fingers, love on demand

Knight in black leather, oh, you've got command

And how I love yo, baby Oh, my knight in black leather

Hold me tight and love me forever

Rings on your fingers, love in your heart

Knight in black leather, we'll never part We're the knights in black leather

And we will chain you down and love you forever

Walk on through the halls of your soul

Yeah, the knights in black leather we're in control You know he smells just like a brand new car

'Cause everything he owns is leather

A leather shirt, leather hat, leather gloves, leather spats

Leather chaps, leather pants, leather socks, leather cap

Leather coat, leather wrap, leather neck, leather ring

Leather thing Knight in black leather, we'll never part

Oh, my knight in black leather

Hold me tight and love me forever  
Rings on your fingers, love in your heart  
Knight in black leather, we'll never part

...
