

Superstrength

All Heroes

Now that I've got my eyes on
There's no distance that I can see
That could keep you away from me
Wrap your arms around my body
And hold on to me real tight, stay close
Even if my back breaks, even if the world takes
When the bomb drops, you'll be here when time stops
I did it all for you
I did it all for us
I'd do it all again for love
Look down to the city if you trust me
Doesn't my heartache look so small from up here?
We're a team, fighting for the same thing
Dreaming of the same dream
Take my life if you must, like all of the heroes before us
We're a team, fighting for the same thing
Dreaming of the same dream
You've got mine, and I've got your back
You've got mine, and I've got your back
You've got mine, and I've got your back
Even if my back breaks, even if the world takes
When the bomb drops, you'll be here and I
When you need me, I'll be waiting
I'll be waiting
Now that I've got my skin on
Nothing can pierce this armor
Handed down by my father
Just that your love is the same is mine
Just that your love is the same is mine
Just that your love is the same is mine
My alien warhead shoots down to Earth
I'll get my suit on, I'll fly face first
There are good people here, there's no time for fear
You've got mine, and I've got your back
You've got mine, and I've got your back
