

# Tonight's Your Night

## New Edition

Here we are, just the two of us  
Holding on to precious romance  
Locked away in another world  
There's nothing wrong when love is with us Sometimes it makes me wonder  
If anybody understands  
How it feels to be so ready for love, girl  
Now that you're with me Tonight's your night  
I want you to feel the power of our love  
Tonight's your night  
No one can stop us now When we met, I might have known  
No matter what you'd be my first love  
Now this feeling sure has grown  
Into so much more than I dreamed of This night was made for magic  
We can't let go of what we feel  
This one's ours alone  
This time baby, all our own Tonight's your night  
I want you to feel the power of our love  
Tonight's your night  
No one can stop us now This night we will remember  
Baby, all of our lives Our time has come, the night has arrived  
So that means all games must be put aside  
The magic is here and it's coming on strong  
And then nothing can stop us now Sometimes it makes me wonder  
If anybody understands  
How it feels to be so ready for love, girl  
Now that you're with me Tonight's your night  
I want you to feel the power of our love  
Tonight's your night  
No one can stop us now Tonight's your night  
I want you to feel the power of our love  
Tonight's your night
